PROFILE

Enthusiastic and detail-oriented Front-End Developer with 2 year of experience in building responsive and user-friendly web applications. Proficient in JavaScript, React, Tailwind CSS, and Redux. Passionate about creating seamless user experiences and optimizing web performance. Adept at optimizing web performance and implementing best practices for web development, I thrive in fast-paced environments and am passionate about continuously learning new technologies and methodologies. With a keen eye for detail and a proactive approach to problem-solving, I aim to contribute effectively to innovative projects that push the boundaries of web development.

PROJECTS

PIZZATERIA

2024

Online ordering pizza platform

- Very simple application, where users can order one or more pizzas
- Requires no user accounts and no login: users just input their names before using the app
- The pizza menu can change, so it should be loaded from an API
- Users should be able to mark their order as "priority" order even after it has been placed
- Live : <https://pizzateria.vercel.app/>

2024

World-Conqueror

keep track of the places they've visited

- Simple web app that allows users to keep track of the places they've visited. Built to highlight routing, the react context API as well as the leaflet library.
- Live : <https://world-conqueror.netlify.app/>

To-Do List

2024

List your Todos

- Simple To-Do List that allows users to save, change and delete profile picture and todos and another things.
- Developed with Vanilla Javascript and Tailwind CSS
- Live : <https://todo-list-ct4i.onrender.com/>
